08.2

1. In which API level did inexact timing become the default for `AlarmManager`?
(All `set()` methods use inexact timing, unless explicitly stated.)
 - API19

08.3

1. What class do you use if you want features like the ones provided by `JobScheduler`, but you want the features to work for devices running API level 20 and lower?
 - `JobSchedulerCompat`
